**WEIGHT LOSS**

## Struggle with Weight Loss?

A normal BMI is between 18-25. If your BMI is over >25, then you are considered "overweight or obese". If you have a BMI of 28 or higher and you have no additional health conditions this may be the right program for you. This program is not first line therapy to treat diabetes type 2.

### AIYANA Weight Loss Program

An All-Inclusive program for 25 weeks that includes all visits, labs, medications, supplies and nutrition/activity counseling. Can be done via Telemedicine.

*Disqualifying medical conditions-* Multiple Endocrine Neoplasia (MEN2), Medullary Thyroid Cancer (self or family), or current treatment and being monitored for Type 1 Diabetes, unstable heart or lung conditions, certain other cancers, history of dumping syndrome or some autoimmune disorders of the gut, gastroparesis or very slow gastric motility, pancreatitis, gallbladder disease, those unable to learn self-injection techniques, unwilling to be complaint with follow up appointments, or those who are pregnant or are breastfeeding.

### Lipo-B MICC Injections:

If you are not overweight, according to your BMI but still would like help to shed that extra 5 - 10 lbs, this option is for you—Weekly Lipo-B MICC Injections to help with fatigue, cravings and feeling fuller longer.

## WEIGHT LOSS

### Lipo-B MICC Injections:

This includes a special lipotropic fat burning combination of methionine, inositol, choline, carnitine and B12.

Each of these ingredients helps the body turn fat into energy and are also powerful antioxidants.

In addition to the Lipotropics blend, Lipo-B also contains a mixture of B vitamins which further help to facilitate fat loss and increase energy.

The formula is then completed by adding ingredients to reduce appetite, build muscle and promote a healthy immune system.

#### Active Ingredients

*Pyridoxine (B6):* Promotes red blood cell production and converts food to energy.

*Methionine:* Helps break down sugars & carbohydrates and convert to energy.

*Inositol:* Converts food to energy.

*Choline:* Healthy nerve cells, cuts muscle recovery time, helps convert fat to energy. *Hydroxocobalamin:* Energy, healthy nerve cells.

*Thiamine (B1):* Improves immune system, helps convert fat and carbohydrates into energy.

*Riboflavin (B2):* Increases metabolism, supports immune system.

*Carnitine:* Improves fat metabolism and energy, reduces recovery times and promotes muscle building potential.

### Semaglutide:

This is a glucagon-like peptide (GLP-1) analog approved in 2017 as a treatment method for improving glycemic control in Type 2 diabetic patients and showed great success in weight loss.

Therefore, this medication was then approved to be used in weight management therapies. Semaglutide demonstrated appetite suppression, improved control of eating, less food cravings, and improved glycemic control.

A series of weekly subcutaneous injections (that you give yourself) to help make you feel fuller, faster, and longer.
